

Erasmus Maris

Strengthening the links between scientific research and education

Pilot project: RAISE-CS

“ Raising education’s sails through citizen science ”

EL MANIFIESTO DE BURRIANA

I hereby pledge to do my part in reducing the impact of microplastics in the environment and to stop feeding the Garbage Island.

I recognize that microplastics are harmful to the environment and that it is our responsibility to take action to reduce their impact. As part of this pledge, I commit to implementing the following actions:

GENERAL:

- I will consider asking my local community to install more garbage containers with trash bags to reduce uncontrolled littering.
- I will favour companies that recycle plastics more efficiently.
- I will support higher taxation for plastic products.
- I agree to pay a deposit for each plastic product I buy, to be reimbursed when the product is brought back for recycling.

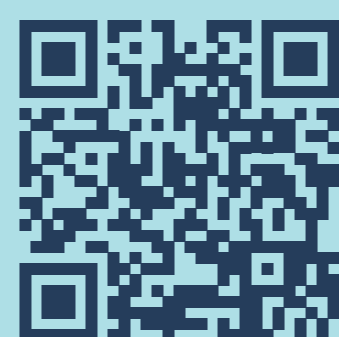

SOCIAL MEDIA:

- I will use my favourite social media apps to increase awareness (educate young generations) about microplastics pollution in the environment and share good recycling practices.
- I will support (donate to) environmental organizations.

GOOD ACTIONS:

- I will reduce my plastic waste.
- I will stop buying products with excessive packaging.
- I will stop buying/accepting plastic bags (even from my school canteen).
- I will organize pick-up litter in my neighbourhood with friends or relatives.
- I will use reusable bottles and cloth bags (that I will not forget at home).
- I will consider installing a microplastic filter on my washing machine.

I WILL ALSO PLEDGE TO SUPPORT THE PETITION FOR THE ERASMUS MARIS PROJECT (SCAN QR)

By signing this pledge, I commit to taking action to reduce the impact of microplastics on the environment and to stop feeding the Garbage Island.
